MD. SAIF ALI

Full-Stack Software Engineer | Node.js | MERN Stack | AI / RAG
Durgapur, West Bengal, India | +91 78108 71384 | saifmd9536@gmail.com | linkedin.com/in/mdsaifali09 | github.com/mdsaifalidev

SUMMARY

Full-Stack Software Engineer with 3+ years of experience specializing in Node.js backends, event-driven microservices, and Generative AI applications (RAG, MCP). Skilled in designing REST and GraphQL APIs, building React.js frontends, optimizing performance, and delivering containerized services to AWS via CI/CD.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Generative AI: RAG, MCP, LangChain, OpenAI & Gemini LLMs, Semantic Search, Prompt Engineering
Backend: Node.js, Express.js, REST APIs, GraphQL, Microservices, RabbitMQ (Event-Driven & RPC), JWT, OAuth2, Stripe, PayPal
Frontend: React.js, Next.js, TanStack Query, Zustand, Tailwind CSS, Socket.IO (WebSockets)
Databases: PostgreSQL, MongoDB, Redis, Prisma ORM, Vector Database (pgvector)
Cloud & DevOps: Docker, Kubernetes, AWS (EC2, S3, IAM, Route 53, CloudWatch, ECR), GitHub Actions (CI/CD), Git
Testing & Process: Jest, Mocha, Chai, Agile/Scrum

EXPERIENCE

Software Engineer | HashCash Consultants, Kolkata, West Bengal | **Sep 2025 - Present**
- Architected a **multi-tenant Retrieval-Augmented Generation (RAG) chatbot platform** (Node.js, Python, LangChain, OpenAI, Google Gemini, pgvector) with isolated per-tenant knowledge bases, cutting manual information-retrieval time by **~30%**.
- Built the RAG pipeline: document ingestion, chunking, embeddings, vector database storage, and semantic search.
- Created a read-only **Model Context Protocol (MCP) server** giving AI agents governed access to organizational knowledge.
- Designed and shipped a **GraphQL API** (schemas, resolvers, query/mutation contracts), reducing payloads and round trips.
- Reduced p95 REST API latency by **20%** in a production MERN environment by optimizing database indexing and query logic.

Full Stack Developer | Ayanlabs Solutions Pvt. Ltd., Remote | **Aug 2024 - Aug 2025**
- Designed and built a Node.js/Express.js microservices backend of **6+ services**, containerized with Docker (images stored in AWS ECR) and deployed on Kubernetes (AWS EKS) using Helm charts.
- Deployed applications on AWS EC2, stored images, PDFs, videos, and backups in S3, managed IAM users, roles, and permissions, connected domains with Route 53, and monitored applications and servers with CloudWatch logs.
- Implemented asynchronous RabbitMQ messaging between services (RPC, event-driven), decoupling core business logic.
- Built GitHub Actions CI/CD pipelines with Mocha/Chai unit and integration suites, cutting manual release effort by **~60%** and raising test coverage to **80%+**.

Full Stack Developer Intern | Sasefied, Remote | **Jan 2024 - Jun 2024**
- Developed features for a PERN-stack (PostgreSQL, Express.js, React.js, Node.js) application through production deployment, including Stripe payments and asynchronous RabbitMQ order confirmations.
- Isolated high-traffic workloads into microservices and reduced page load times by **~40%** through PostgreSQL query optimization, Redis caching, and TanStack Query.

Full Stack Developer Intern | E-SUTRA Technologies Pvt. Ltd., Remote | **Jun 2023 - Nov 2023**
- Built MERN-stack features, including RESTful APIs and third-party payment gateway integrations.
- Integrated OAuth2-based social login and refined UI/UX iteratively within an Agile/Scrum team.

PROJECTS

Mock Interview AI | Node.js, Express.js, React.js, MongoDB, Google Gemini API | mockaiinterview.vercel.app
- Developed a Gemini-powered platform that generates role-specific interview questions and evaluates candidate responses in real time, with Stripe subscription billing.
- Added speech-to-text transcription with prompt-engineered structured feedback, plus Redis caching and TanStack Query.

Shopfinity (E-Commerce) | Next.js, TypeScript, Express.js, Prisma, PostgreSQL | shopfinity-xi.vercel.app
- Built a TypeScript REST API with role-based (User/Admin) JWT authentication and refresh-token rotation.
- Developed an admin dashboard (products, inventory, categories, Cloudinary media) plus a persistent cart, PayPal checkout, order tracking, and a coupon system.

EDUCATION

Bachelor of Computer Applications (BCA) | Bengal College of Engineering and Technology (BCET), Durgapur | **2022 - 2025**

CERTIFICATIONS

NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) | Udemy
Certificate: ude.my/UC-d9afe7b1-4a9f-4111-8355-cd1d05775d53
